Lori Okun and Philip G. Wyels  
State Water Resources Control Board  
PO Box 100  
Sacramento, CA 95812

Dear Prosecution Team:

I, [REDACTED], have been randomly selected by the Central Coast Regional Water Quality Control Board for prosecution for violations of a septic system discharge prohibition. Prior to purchasing my home in 1992, the septic tank was inspected and repaired to the specifications and approval of the San Luis Obispo Department of Planning. After moving in, my new neighbors and I obtained the proper permits for removal the eucalyptus trees which posed a continued threat to our septic systems. My tank was pumped in August of 2006 by Al's Septic Pumping Service, and reported to be functioning normally. No one from the RWQCB has ever inspected or tested my septic system. The Cease and Desist Order, delivered to my mailbox, was my first communication from the RWQCB of a discharge violation.

The severity of a CDO became apparent when I called Stan Sprague, Watershed and Resource Strategies, for clarification. The consequences of this action by the RWQCB are astounding. If, due to inadequate supply of septic pumpers, I am unable to get an appointment for pumping by the designated date, I will be charged \$1000 a day late fees. If the charges continue to mount even for reasons beyond my control, I can lose my home. Even if I abandon my home, the fines from a CDO can follow me and continue to grow. My property has lost value and my ability to sell has diminished. The RWQCB has indicated that these are "unintended consequences", but intended or not they are very real consequences of a CDO and I must do what I can to protect my home and my future. With a CDO, all that I have worked so hard for and over so many years will be at the mercy of the current and future RWQCBs. This is based on the presumption of a violation under circumstances far beyond my individual control.

I explored alternatives that would eliminate nitrates from my septic system, investigating composting toilets. I found that they were safely used in many innovative and forward thinking communities and countries. I was very disappointed when Matt Thompson of the RWQCB cut off that possibility writing, "Dr. Greg Thomas of San Luis Obispo County Environmental Health Department has indicated that he will not approve composting, portable, or incinerator toilets in Los Osos." Prior to receiving this communication I called both the County Planning and Environmental Health and was told by receptionists that they did not know of any regulations for composing toilets. Another Planning department employee indicated that it was the RWQCB that was blocking citizens of Los Osos from pursuing this alternative. How am I, a citizen, supposed to propose alternatives when you will not even consider those alternatives exemplified by SWRCB and US EPA on their websites?

The solution that you did choose, pumping all the septic tanks of Los Osos every other month from now until 2010 (or a sewer is built) will not make a significant difference in removing the nitrates in the upper aquifer. What it will do is increase overdraft of the lower aquifer, waste millions of dollars each year with no benefit to a sewer project, lead to degradation of septic systems, waste natural resources (water, diesel fuel), and contribute to increased air pollution and road deterioration along disposal routes.

I am not a lawyer. I am a full time special education teacher. I have tried taking time off work to prepare my defense, but this is disruptive to the education of my students. Due to my work hours, I am unable to gain access to the prosecution documents, or to conduct other government research during normal government business hours. I asked for and was denied an extension beyond the April 5<sup>th</sup> deadline. So, you can work full time for the government to prepare to prosecute me, while I am working full time for the government to educate our youth, severely hampering my defense. I was not offered legal counsel. The cost of an attorney versed in water issues is far beyond my means. Where are my constitutional rights?

I reserve the right to use any and/or all documents submitted by the CSD in my defense of my property and rights. I reserve the right to use any witnesses submitted by the CSD in my defense of my property and rights. I reserve the right to assistance when presenting my defense before the

board, by persons of my choosing. Cease and Desist Orders were not designed to persecute individual citizens.

The RWQCB mandated in 1983 that Los Osos develop and implement a septic management plan and a water management plan, as well as develop a wastewater treatment facility: 1) Upon taking office in November of 2005, the current CSD asked to implement a septic management plan in negotiations with the WaterBoard and Rep. Sam Blakslee. 2) The current CSD has already hired a firm to update the wastewater treatment project. 3) The CSD is currently developing a water management plan.

The current CSD is not composed of savvy politicians. It is a group of concerned citizens with expertise in engineering and biology who have made a significant commitment to their community, a commitment to protect our water. Please let them proceed. The Cease and Desist Orders will only lead to long, drawn out court battles, dredging up the lies and deceit of our forefathers. This is counterproductive to our ultimate goal: a sewer.

Sincerely,

[REDACTED]

SUBJECT: APPLICATION FOR TREE REMOVAL (Hazardous Tree Determination)

The Planning Department staff has inspected the site at 1709 14th Street in Los Osos and we are approving your request for removal of two (2) eucalyptus trees, subject to the following condition(s):

- (1) the trees may not be removed without permission of the property owner and
- (2) each tree must be replaced on the site with a specie common to the community. (Call 549-5196 for a replacement inspection when the new trees are planted.)

This approval does not authorize the removal of any other trees on this or adjacent sites.

Please contact me at (805) 549-5600 if you have any questions.

Sincerely,

*Barney McCay*

[REDACTED]

Thanks for your email. I appreciate you exploring options to comply with the Cease and Desist Order's interim requirements to reduce pollutant loading and your desire to have a positive effect on the environment. Composting toilets may initially sound promising, but are not a viable alternative. The Uniform Plumbing Code does not allow composting toilets unless approved by the local health officer. Dr. Greg Thomas of San Luis Obispo County Environmental Health Department has indicated that he will not approve composting, portable, or incinerator toilets in Los Osos.

>>> [REDACTED] 2/25/2006 7:18 PM >>>

I received a Cease and Desist order (# R3-2006-1034) and am very interested in installing a composting toilet as an alternative. This would be reducing nitrates entering my septic tank by over 22%. I have found general information on your Waterboard website as well as the EPA website, but I am having difficulty finding anyone locally with experience with this technology. Is this a reasonable alternative to pursue?  
I am a full time special education teacher and don't have time or energy to waste on ideas that are unlikely to be approved, but I sincerely like to find an alternate that has a positive effect on the environment.
